M. U. SUMMER SCHOOL IS JUNE 8 TO AUGUST 4

Exceptional Opportunities Offered Those Unable to attend Regular Session.
"The Summer Session of the University of Missouri at Columbia this year will offer exceptional opportunities to those who are unable to attend the regular session of the University," says Prof. J. D. Eliff, director of the Summer Session. The Summer session will begin June 8 and close August 4.
The summer Session bulletin has just been published. It describes completely the various new features of the instruction. Courses will be offered in Agriculture, art, economics, education, English, Geology, ancient languages, home economics, history, library methods, manual arts, music, philosophy, physical education, romance languages, sociology and journalism.
Superintendents, principals, high school teachers, grade and rural teachers, graduates of institutions in the Missouri College Union, graduate students, and regular University students will find courses directly related to their special problems, according to the bulletin. A number of well known lecturers will visit the University during the summer.
Recreation is an important feature of the summer school life. The tired teacher, after a year's toil, will find recreation on the athletic fields of the institution. The social and religious opportunities will be the same as during the regular session, with the Y. M. C. A. and Y. W. C. A. leading in the work. The six churches situated near the University take an active interest in the welfare of the students.
Stop Those Gullies!
Small gullies that have started in the field should be stopped by filling them with straw or similar material. If the gully is large it is advisable to plow in soil on top of this material and sow to oats or later to sorghum so that the crop will come up thick and form a strong root mass to bind the soil together. The proper use of debris for filling and rank growing plants for holding the soil will stop most washes entirely. Eternal vigilance, however, is necessary for complete success.—M. F. Miller, Missouri Agricultural Experiment Station.

DOES YOUR STOMACH TROUBLE YOU?
MAYR'S Wonderful Stomach Remedy will change that Long Face!
And One Dose Has Often Dispelled Years of Suffering.
Mayr's Wonderful Remedy can really be termed WONDERFUL. No matter where you live—you will find people who have suffered with Stomach, Liver and Intestinal Ailments, etc., and have been restored to health and are loud in their praise of this remedy. It acts on the source and foundation of these ailments, removing the poisonous catarrh and bile accretions, taking out the inflammation from the intestinal tract and assisting in rendering the same antiseptic. Sufferers are urged to try one dose—which alone should relieve your suffering and convince you that Mayr's Wonderful Remedy should restore you to good health. Put it to a test today. Send for booklet on Stomach Ailments to Geo. H. Mayr, Mfg. Chemist, 156 Whiting St., Chicago, or better still obtain a bottle from your druggist.

MERCHANTS SHOULD NOT ADVERTISE ON FENCES

Farmers Read Newspapers Nowadays, Says J. B. Powell of M. U.
"A farmer has as much right to paint a sign that he has butter and eggs for sale on the front window of the best store in town as the merchant has to paint his signs all over the farmer's barns and front yard fences," was the statement of J. B. Powell, instructor in advertising at the University of Missouri at Columbia in a speech before the Commercial Club of Hannibal recently.
Mr. Powell said that merchants should cease the use of this primitive form of advertising for farmers are now reading newspapers. He told of several cases where ornamental concrete bridges on good roads have been practically ruined from the standpoint of beauty through the painting of signs by merchants in nearby towns. He said that this kind of advertising would never get any business from the farmers who put up the money to build the roads and the bridges.
"You will not find any mail order house signs on the sides of barns or on fences, but you may find the name of the mail order house on the shipping tags that brought these articles to the farmer's home. Mail order houses respect the farmer's intelligence by sending him an attractively printed book from which to order merchandise. No wonder they get the farmer's confidence and business," Mr. Powell declared.
MISSOURI MINERALS.
Missouri Geological Survey Shows Valuable Minerals Exist in Great Variety.
Missouri has a great variety of mineral deposits and is one of the chief mining states of the Union; according to state geologist, H. A. Buehler. The following terse facts show the wide range in mineral wealth, the output of which is valued at more than \$55,000,000 annually.
Cobalt occurs near Fredericktown.
Red Granite is quarried in Iron and St. Francois counties.
Tungsten is found at the Einstein Silver Mine in Madison county.
Tripoli is extensively quarried in western Newton county.
Pyrite, used in making sulphuric acid, is produced in Franklin county.
Copper has been mined in Madison, Ste. Genevieve, St. Francois, Shannon and Crawford counties.
Nickel has been recovered from the lead, copper, cobalt, nickel ores of Madison county.
Very pure sand, used in the manufacture of plate glass is produced at Pacific and Crystal City.
Oil and gas in small quantity have been encountered at shallow depths near Kansas City.
Mineral waters occur in many natural springs and deep wells scattered over the state.
Missouri produces 50% of the barite mined in the United States. Washington county is the largest producer.
Silver is recovered from the lead ores of southeast Missouri. They carry about one ounce per ton of concentrates.
Gray marble of the finest quality is produced and shipped to all parts of the United States from the quarries at Phoenix and Carthage.
Red iron ores are found in the central Ozark region. Brown iron ores occur in most of the counties in the southeastern part of the Ozark region.
Portland cement is manufactured near Kansas City, Hannibal, St. Louis and Cape Girardeau. Over 4,750,000 barrels are

produced annually.
Missouri is one of the chief lime producing states. Large plants are located at St. Louis, Springfield, Pierce City, Ash Grove and Ste. Genevieve.
The greatest lead mines in the world are located in St. Francois county. Missouri produces more lead than any foreign country or any other state in the Union.
Coal is mined in 30 counties extending from the Iowa to the Kansas State line. The beds vary from 18 to 60 inches thick, and the total output per year is about 4,000,000 tons valued at \$7,000,000.
The biggest zinc producing region of the world centers at Joplin, Jasper county. The ores are noted for their purity. There are about 700 zinc mines in this State which produce ores valued at \$18,000,000.
St. Louis is the largest fire clay center of the United States. Flint fire clays occur through the Ozark region and kaolin is found in southeast Missouri, of suitable quality for china ware.

Mrs. A. E. Ewart left Thursday evening for her home in Marysville, Kansas, after a visit here with her sister, Mrs. D. E. Collard.
Safe Medicine for Children.
"Is it Safe?" is the first question to be considered when buying cough medicine for children. Chamberlain's cough remedy has long been a favorite with mothers of young children as it contains no opium or other narcotic, and may be given to a child as confidently as to an adult. It is pleasant to take, too, which is of great importance when a medicine must be given to young children. This remedy is most effectual in relieving coughs, colds and croup. Obtainable everywhere.
Rev. F. M. Burton went to Odessa Thursday on church business.
Spring.
Spring is looked upon by many as the most delightful season of the year, but this cannot be said of the rheumatic. The cold and damp weather brings on rheumatic pains which are anything but pleasant. They can be relieved, however, by applying Chamberlain's Liniment. Obtainable everywhere.
Mrs. N. T. Wikoxon and her sister, Miss Atlas Golliday, returned Thursday evening from a few days' visit in Kansas City.
Why Constipation Injures.
The bowels are the natural sewerage system of the body. When they become obstructed by constipation a part of the poisonous matter which they should carry off is absorbed into the system, making you feel dull and stupid, and interfering with the digestion and assimilation of food. This condition is quickly relieved by Chamberlain's Tablets. Obtainable everywhere.
D. D. Gwinner was in Kansas City Friday on business.
Insomnia.
Indigestion nearly always disturbs the sleep more or less, and is often the cause of insomnia. Eat a light supper with little if any meat, and no milk; also take one of Chamberlain's Tablets immediately after supper, and see if you do not rest much better. Obtainable everywhere.
